

BEIJIA TANG

Unlimited Work Entitlements (visa subclass 485) | Manual Open Driver Licence QLD

✉ beijia.tang@uq.net.au ☎ [0411598567](tel:0411598567) 📍 Brisbane City 🌐 [Linkedin](#)

Summary

Applied Spatial and Environmental Scientist with experience in **ecology** and **geoscience**, with technical skill of **GIS suite, Python**, and **CAD**. Building experiences in **impact assessments** and integrating **sustainability data analysis** into project outcomes. Leveraging a **multicultural background** with inquisitive and adaptive problem-solving. Committed to advancing excellence in **environmental sector** through evidence-based strategies, developing practical **nature-positive solutions** that deliver measurable community impact.

Professional Experience

Department of Resources (NRMRRD), Queensland Government

Senior Spatial Information Officer in Location Data and Native Title Team

Brisbane

Aug 2025 - Present

- Maintained the Queensland Place Names Gazetteer and native title determination datasets using ArcGIS Pro, ArcGIS Online, and FME, ensuring compliance with the Place Names Act 1994, Native Title Act 1993, and Vegetation Management Act 1999. Researched and verified historical cadastral plans and boundary definitions supporting land compensation outcomes adjudicated in Queensland courts. Developed Python scripts and FME workbenches to automate spatial joins, data validation, and cross-dataset integration across administrative boundary, place names, and native title claims workflows. Liaised with local councils, government departments, and legal teams to resolve boundary discrepancies, and provided technical guidance on departmental spatial information to internal and external stakeholders via Jira.

Hydrobiology QLD Pty Ltd

Aquatic Scientist in Environment and Biodiversity Management Team

Brisbane

Feb 2024 - Aug 2025

- Conducted habitat mapping using ArcGIS Pro and designing EPBC Act mitigation strategies for projects affecting 4 threatened species ;
- Applied AUSRIVAS bioassessment methodology to analyze invertebrate data, supporting ecological condition evaluation of 10+ river sites.;
- Collaborated with teams to compile water quality analysis inputs, supporting report preparation with Environmental Legislations (RPP 2018, REMP) and regional guidelines.

Geoconsult Pty Ltd

Spatial Science/GIS Analyst, Lab Technician

Brisbane

Oct 2023 - Dec 2025

- Generated project maps for drilling plans and landholder consultations using QGIS, developed fugitive gas emission models using Python integrating laboratory desorption datasets to support EA approvals and regulatory reporting.
- Provided field support for soil sampling and geological core logging using WellCAD, liaised with laboratories and vendors for sample logistics and equipment procurement, and maintained emergency maps compliant with WHS requirements.
- Conducted multispectral remote sensing analysis using satellite imagery for surface anomaly detection and soil type characterisation, contributing to exploration targeting and biodiversity offset documentation.

Mining & Energy Technical Services Pty Ltd

Casual Ecological consultant

Brisbane

Feb 2023 - Apr 2023

- Independently analyzed 400+ leaf specimens via FijilImage, quantifying mining emission damage to support *Sulphur Dioxide Impact Monitoring*.
- Contributed to mine closure PRCP strategies by assessing vegetation health in landform stability simulations using the SIBERIA model, with implications for ecosystem recovery.

The Paradise International Foundation

Nature Education Team assistant

Remote

July 2020 - July 2022

- Delivered an eco-tourism bird-pond project combining habitat restoration with native planting, low-impact sustainable infrastructure to boost conservation and local income.
- Authored an anti-poaching initiative for a Nature Reserve buffer zone, combining AI-driven monitoring of e-commerce platforms to strengthen citizen science participation.

Education

University of Queensland

Bachelor of Marine Science, Master of Environmental Management (GPA6.5/7)

Feb 2021 - July 2023

Award: International Onshore Merit Scholarship, Dean's Recommendation for Academic Excellence

Environmental risk and impact assessment, Conservation biology, Conservation policy, Biostatistics, Ecology and conservation, Coastal Management, Paleoecology and fire management.

University of Bologna (Italy)

Laurea Triennale Natural Science

Sept 2015 - Nov 2020

Chemistry, Physics, Zoology, Plant biology, Genetics, Physiology, Geology, Paleobiology.

Volunteering

Professional Environmental Women's Association (PEWA QLD) Brisbane	Aug 2024 - Present
Supported event coordination, assisted with website update to promote networking and professional growth among women in environmental fields	
Science Under Sail Moreton Bay	Dec 2023, Oct 2024
Conducted extensive seagrass benthic survey in Morton Bay, logged data with 99% accuracy. Deployed underwater cameras and assisted with sailing operations during research vessel. Our team successfully completed over 500 sites.	
Climate Science (climatescience.org) Remote	Nov 2020 - May 2022
Translated web pages and educational materials (including crash courses/children's books) from English to Chinese. Created climate-themed graphics using Photoshop to help the team communicate environmental knowledge effectively.	
Botanic Garden and museum of Bologna Bologna, Italy	Oct 2016 - Oct 2017
Monitored greenhouse conditions, performed plant treatments, and maintained garden facilities. Organized social events and translated educational brochures to engage international students while promoting inclusivity initiatives.	

Academic Research

Exploration the carbonate variability of the Great Barrier Reef	July 2022 - Jan 2023
Compiled and analysed spatial and temporal water chemistry and carbonate data to assess ocean acidification and chemical stressors on reef ecosystems, contributing to understanding impacts on water quality following ANZ Guidelines for Fresh and Marine Water Quality and marine biodiversity.	
A study of potential carbon storage in the Diamantina Basin, QLD	Feb 2022 - June 2022
Hydrological modeling was employed to validate that the carbon storage potential of the Diamantina River within the range observed in arid and semi-arid areas worldwide, integrating water flow dynamics using HYDRUS-2D to support sustainable carbon management.	
Paleoecological research of Chamelea gallina from North Adriatic	Oct 2017 - Oct 2018
Analysed fossil shell morphology as proxies for historical water temperature and chemistry, providing insights into long-term aquatic ecosystem changes in response to environmental gradients.	

Certifications

MOOC Cartography, Imagery Foundation ESRI	Oct, Nov 2025
Certificate in Sustainable (ESG) Investing CFA Institute	June 2024
Introduction & Advancing to Sustainable Development in Practice UNCC	Apr 2024
Construction White Card Queensland Government	Oct 2023
The Red List of Ecosystems for Assessors IUCN	Oct 2022
Sustainable Development in Biosphere Reserves UNESCO	Oct 2022
